In 2005, unlike previous years there were no groundbreaking changes in insurance legislation. The Czech Republic was not affected by any major natural disasters. Even so, it was a difficult year for insurance companies.

In the first half of the year, the Association worked hard to complete the application of the new insurance laws adopted in 2004. The key new legislation here was the Act on Insurance Contract and the Act on Insurance Intermediaries and Independent Loss Adjusters, which entered into effect on 1 January 2005. The Association contributed to arrangements for the registration of these persons and to the preparation of professional examinations. I am very pleased that the ČAP Study Texts were broadly used by Association members and other insurers. We also responded to the Financial Conglomerates Act and to the government decision on financial market supervision and the tasking of this supervision to the Czech National Bank, which were adopted in the second half of the year. Personally, I believe it is very important that the new legislation promotes the greater transparency of the financial market and ensures that clients and insurance companies have clearly defined rights and obligations.

Nevertheless, the actual legislative process – especially in the final quarter of 2005 and the first four months of 2006 – progressed along relatively unconventional lines, where amendments were made to certain laws that were detrimental to insurers and clients without prior consultation with the insurance market. An example of this would be the changes made to the assessment bases used to determine social security and general health insurance contributions. Despite the fundamental opposition of the Association and the professional business public, the Act on Accident Insurance of Employees was adopted, which will require the transformation of existing workmen's compensation insurance into de facto social insurance. Insurance companies will no longer be allowed to administrate or commercially operate this insurance, even though – unlike the government – they can draw on years of know-how and teams of experts to cope with it. In this case, other possibilities surfaced – in particular Public Private Partnerships.

There was a year-on-year slowdown in the growth of insurance market output. Preliminary results indicate that in 2005 total premiums written in the Czech Republic increased by 4.1% to CZK 117.2 billion. Dynamism stalled in life assurance in particular, where growth was just 1.7%. This can be put down to the drop in single-premium policies, which overall fell to a level below that recorded in 2003. On the positive side, in currently paid policies – the backbone of long-term insurance market stability – growth was more than 9%. Non-life insurance registered growth of 5.6%.

However, I remain convinced that despite the lower pace of growth and stagnation, which are entirely normal in certain cycles even on other developed insurance markets, the Czech market is well positioned for dynamic development.

The growth rate of premiums written is just one aspect. We must also bear in mind that insurance companies reinforced their economic power in 2005 and are in competition with each other in terms of service quality and promptness, and clients benefit from this.

The world insurance industry was affected by a number of large-scale natural disasters last year. Reinsurers have named it one of the worst periods in the history of insurance. As damage was incurred not only by the direct insurers, but also by reinsurers, the effect of these natural disasters is bound to be felt on the Czech market too. It is likely that reinsurance rates will go up for Czech insurance companies in the next few years, which could be reflected in industry insurance rates in particular.

I am confident that the insurance market has successfully overcome its slow down period and that it will now start developing more quickly again. However, for this to hold true, government backing is essential. We will seek at least an increase in the tax relief available for private life assurance and supplementary pension schemes, and I believe we will be met with understanding. In the future, these supplementary systems should play a steadily increasing role in the individual financial plans of the public, especially when we consider that the existing pension schemes are unsustainable. However, we are prepared to foster broader cooperation with the government in pension reform and, for example, in the multi-source financing of the health service. We will also focus on preparations for new European legislation which, to a high degree, will affect the environment in which we operate.

I am convinced that we will meet our clients' expectations.

_ Bertow

Ladislav Bartoníček President of the Czech Insurance Association

Development of the National Economy

The national economy developed positively in 2005. The forecast rise in the gross domestic product (GDP), which went up in constant prices by 6.1%, held true. This result is the best recorded in the past ten years. In 2003, the growth rate was 3.6%; in 2004 it was 4.2%.

The GDP growth was prompted in particular by a 10.6% hike in exports in constant prices compared to 2004. Imports were up by 4.9%. Based on calculations by the Czech Statistical Office, external trade accounted for nine tenths of the GDP increase.

The dynamic GDP growth was fuelled inter alia by domestic demand, which in constant prices rose by 2.3% in 2005.

In real terms, sales went up by 8.1% in industry and by 3.7% in construction.

Economic developments were accompanied by a low inflation rate, measured as the average price level over the twelve months of the monitored year compared to the price level of the twelve months in the previous year. In 2005, the inflation rate stood at 1.9%; in the preceding year it was 0.9% higher. The average real wage increased by 3.4%. The Czech crown appreciated against both the euro and the US dollar. The registered unemployment rate in 2004 was around 10%. In 2005, it fell to roughly 9%.

Problems in economic development concentrated on several imbalances. In 2005, although there was no problem with a trade balance deficit (as there was a surplus), there was another deficit in the balance of payments current account of almost CZK 62 billion. The national budget deficit in 2005 was CZK 56.3 billion, which can be considered an improvement compared to the deficit of CZK 93.7 billion in 2004.

The economic environment in the Czech Republic was relatively favourable for the development of the insurance sector.

	2003	2004	2005
GDP – year-on-year change (constant prices)	3.6	4.2	6.1
Industry – sales (constant prices)	5.8	9.9	8.1
Year-on-year inflation	0.1	2.8	1.9
Registered unemployment rate	9.9	10.2	9.0
National budget deficit relative to GDP (current prices)	-4.2	-3.4	-1.9
Current account relative to GDP (current prices)	-6.2	-6.0	-2.1

Development of the Czech Insurance Industry in 2005

Insurance Legislation

2005 was the second year of the Czech Republic's membership of the European Union. The key stage of harmonizing Czech insurance law with the European Union's legislation on insurance was achieved in 2004 with the adoption of four insurance laws. The following two laws entered into effect on 1 January 2005:

- Act No 37/2004 on Insurance Contract,
- Act No 38/2004 on Insurance Intermediaries and Independent Loss Adjusters.

In 2005, the implementation of further EU legislation continued. Act No 377/2005 on the supplementary supervision of banks, savings and loan associations, electronic money institutions, insurance undertakings and investment firms in financial conglomerates and amending other laws (the Financial Conglomerates Act) entered into effect on 29 September 2005 (with full force as of 30 September 2006).

This law regulates the supplementary supervision of regulated entities (insurance companies or domestic reinsurers) operating in financial conglomerates, relations between entities charged to supervise individual sectors of the financial market, and the obligations of entities operating in financial conglomerates. The purpose of supplementary supervision is to limit the risks to which regulated entities are exposed as part of a financial conglomerate. The law also lays down supplementary rules of prudential business and regulates administrative delicts.

Another significant piece of legislation for the insurance industry was Act No 411/2005 amending Act No 361/2000 on road traffic and amending certain laws, as amended, Act No 200/1990 on minor offences, as amended, Act No 247/2000 on acquiring and developing professional competence to drive motor vehicles and amending certain laws, as amended, and certain other laws.

The amendment to the Road Traffic Act is a radical change aimed at reducing the number of traffic accidents and deaths on Czech roads. For example, it lays down new obligations for drivers and introduces penalty points for breaches of the obligations referred to in the law. The amendment to the Minor Offences Act is also significant as it amends minor offences related to the safety and free flow of traffic on roads and increases fines.

Insurance companies are directly affected by § 47 of this Act, which regulates traffic accidents. Inter alia there is an increase in the limit of damage to property caused to a vehicle covering cases where a traffic accident need not be reported to the police, provided that other requirements of the law are met (the limit rose from CZK 20,000 to CZK 50,000).

In 2005, the legislative process also centred on other laws, some of which were adopted in the reporting year but did not enter into effect until after 31 December 2005.

Of this, the most important is Act No 57/2006 amending laws in connection with the unification of financial market supervision. Since this law entered into effect on 1 April 2006, supervision has been integrated into the Czech National Bank (CNB). The government decided on this solution under Resolution No 1079 of 24 August 2005. The CNB became the only body supervising entities operating on the financial market. CNB is required to conduct analyses of developments in the financial system, ensure the safe functioning and development of the financial market in the Czech Republic, and contribute to the stability of the Czech Republic's financial system as a whole. As for the insurance industry, the CNB took over the agenda of the Office of State Supervision in Insurance and Pension Funds, which was part of the Ministry of Finance of the Czech Republic.

In the CNB's organizational structure, there are three integrated supervision sections:

- the banking supervision section,
- the insurance regulation and supervision section,
- the capital market regulation and supervision section.

Under this law, a Financial Market Committee is to be set up, the chairperson, vice-chairperson and other member of which are appointed by the budgetary committee of the Chamber of Deputies of the Parliament of the Czech Republic based on nominations from professional and special-interest organizations.

This Act amended 33 other laws, including the Act on Insurance, the Act on Insurance Contract and the Act on Insurance Intermediaries and Independent Loss Adjusters.

The legislative process related to Act No 182/2006 on insolvency and methods for the solution thereof (the Insolvency Act) was very demanding and protracted; it will enter into effect on 1 July 2007.

At the end of 2005, the Ministry of Finance of the Czech Republic started preparing an amendment to Act No 168/1999 on motor third-party liability insurance, as amended. This amendment envisages the transposition of the Fifth Motor Insurance Directive. It is due for discussion by the Czech government in the second half of 2006.

In 2005, changes were prepared for the following decrees of importance for the industry sector, which were promulgated in the first quarter of 2006:

- Decree No 40/2006 amending Decree No 582/2004 implementing certain provisions of the Act on Insurance Intermediaries and Independent Loss Adjusters,
- Decree No 96/2006 amending Decree No 303/2004 implementing certain provisions of the Act on Insurance,
- Decree No 100/2006 amending Decree of the Ministry of Finance of the Czech Republic No 114/2002 on Cultural and Social Requirements Fund (welfare funds), as amended by Decree No 510/2002.

Insurance Companies in the Czech Republic

As at 31 December 2004, 40 insurance companies were engaged in insurance operations in the Czech Republic. In 2005, their number rose to 45.

Number of Insurance Companies by Type of Activity

	1995	1996	1997	1998	1999	2000	2001	2002	2003	2004	2005

* not including insurance companies from EU Member States operating in the Czech Republic in accordance with the freedom to provide services on a temporary basis, and not including the Czech Insurers' Bureau.

Source: ČAP, Ministry of Finance, Czech National Bank

Of these 45 insurance companies, five can be characterized as life insurers, i.e. companies that wrote one or more classes of life assurance. Twenty-three insurance companies were non-life insurers, i.e. companies that wrote one or more classes of non-life insurance. Seventeen insurance companies were "composite" insurers, meaning that they simultaneously wrote one or more classes of life insurance and one or more classes of non-life insurance. Number of Insurance Companies - Czech and Foreign

	1997	1998	1999	2000	2001	2002	2003	2004	2005
TOTAL NUMBER OF INSURANCE COMPANIES	40	41	42	41	43	42	42	40	45

* organizational units up to 2003									
Source: ČAP, Ministry of Finance, Czech National Bank									

Of the total number of insurance companies operating in the Czech Republic in 2005, 33 were domestic insurance companies and twelve were foreign branches of insurance companies from EU Member States (4 from Germany, 3 from Slovakia, 2 from the Netherlands, 2 from Austria, and 1 from the United Kingdom). The number of branches went up by five compared to 2004. Of the Czech insurance companies, 32 were public limited companies and one was a cooperative. In 2005, the number of insurance companies with mostly foreign capital increased by one and

the number with mostly domestic capital fell by one.

In 2005, due in part to the increased number of insurers, competition on the Czech insurance market became keener. As at 31 December 2005, 328 insurers and branches from the EU has expressed an interest in operating insurance activities in the Czech Republic in accordance with the principle of the freedom to provide services on a temporary basis.

Insurance companies continued to innovate their insurance products and expand their product portfolios. Overall, roughly 250 types of insurance or insured risks were available. Further basic information on the range of insurance products can be found on page 26 - 27 of this Annual Report. In addition, a detailed overview of insurance products is available from the interactive menu on the website of the Czech Insurance Association (www.cap.cz).

Act No 38/2004 on insurance intermediaries and independent loss adjusters introduced radical changes into intermediation services with a view to enhancing the quality of services, improving consumer protection and safeguarding the functioning of the "European passport" for these entities.

Registration of Insurance Intermediaries and Loss Adjusters

The Czech Insurance Industry in a European Context

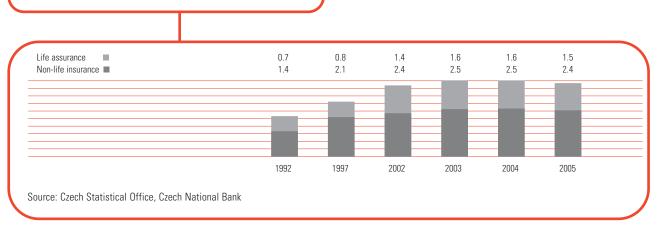

Total premiums written in the Czech Republic climbed by 4.1% in 2005 and the gross domestic product (GDP) went up by 7.1% in constant prices. Total insurance penetration, defined as the ratio of premiums written to GDP, came to 3.9% in 2005. In 2004, penetration was 4.1%, and therefore there was a slight reduction in 2005 for the first time since 1991. The root of this change in trend is the faster growth in GDP than in premiums written.

Total Insurance Penetration in the Czech Republic (%)

	1992	1997	2002	2003	2004	2005
Ratio of premiums written to GDP	2.1	2.9	3.8	4.1	4.1	3.9
Life assurance	0.7	0.8	1.4	1.6	1.6	1.5
Non-life insurance	1.4	2.1	2.4	2.5	2.5	2.4

Source: Czech Statistical Office, Czech National Bank

Total Insurance Penetration in the Czech Republic (%)

The total insurance penetration in the Czech Republic is still much lower than the EU average. According to the more refined data maintained by the CEA, the ratio of premiums to GDP in the 25 Member States in 2004 was an average of 8.5%.

Insurance Penetra	ion in Selected	Countries (%)
-------------------	-----------------	---------------

	1992	2004
EU (25)	6.2	8.5
Czech Republic	2.6	4.4*
Estonia	-	2.2
Cyprus	3.2	4.6
ithuania	_	1.5
atvia	_	1.9
Hungary	2.0	3.0
Malta	3.2	5.7
Poland	1.8	3.3
Slovakia	1.9	3.7
Slovenia	3.2	5.7
* CEA calculation in EUR		
Source: Comité Européen des Assurances (CEA), European Insurance in Figures, May 2006		

The Czech Republic is still at roughly half the average of all EU Member States. Of the ten new EU members, the Czech Republic is only behind Cyprus, Malta and Slovenia in this indicator. Between 1992 and 2004, total insurance penetration in the Czech Republic increased from 2.6% to 4.4% (according to CEA calculations).

The difference in total penetration between the Czech Republic and the EU average cannot be closed in the short term as it is of a structural nature. This gap can be plugged by further dynamic development of the Czech economy, a rise in real wages, the involvement of the insurance industry in pension reform or multi-source financing of the health service, etc. There is a greater difference in life assurance than in non-life insurance. The average annual life assurance premium in the EU in 2004 was EUR 1,147, but just EUR 136 in the Czech Republic. The respective figures for non-life insurance were EUR 750 and EUR 207.

There are differences between the individual insurance markets of EU Member States – these differences are not found solely in the Czech Republic. They are of a long-term structural nature (and can roughly be grouped into the original 15 Member States and the 10 new Member States) and of a short-term nature in relation to the current development of the relevant economies and their insurance markets.

We can illustrate this by pointing out the different rates of growth in life assurance premiums written in selected EU Member States. While we produce no detailed analysis as evidence, we can state that progress in pension reform or tax advantages are a definite boost to the development of life assurance.

Member State	Premiums in 2005	Growth rate 2005/200		
	(EUR millions)	(%, adjusted for inflation		
EU (25)	569,633	6.5		
Austria	7,122	13.2

New EU Insurance Legislation

In 2005, the European Commission dealt with the preparation of its financial services policy for the period from 2005 to 2010, and published a Green Paper on 3 May 2005. Based on consultations with parties including the European insurance industry, a binding White Paper was published on 5 December 2005.

White Paper: Financial Services Policy 2005 - 2010

The White Paper sets out the priorities of the European Commission's policy in the area of financial services up to 2010. These include:

- consolidate dynamically towards an integrated, open, competitive, and economically efficient EU financial market,
- remove the remaining economically significant barriers so financial services can be provided and capital can circulate freely throughout the EU at the lowest possible cost – with effective levels of prudential and conduct of business regulation, resulting in high levels of financial stability, consumer benefits and consumer protection,
- implement, enforce and continuously evaluate the existing legislation and apply rigorously the better regulation agenda to future initiatives,
- enhance supervisory cooperation and convergence in the EU, deepen relations with other global financial marketplaces and strengthen European influence globally.

As regards insurance, the White Paper includes a project called "Solvency II". With the project "Guarantee Schemes in the Insurance Industry" no definitive decision has been made on whether to draw up draft legislation.

An overview of specific tasks and activities can be found in the annex to the White Paper.

Selected EU legislation published in 2005

Directive 2005/68/EC of the European Parliament and of the Council of 16 November 2005 on reinsurance and amending Council Directives 73/239/EEC, 92/49/EEC as well as Directives 98/78/EEC and 2002/83/EEC (Text with EEA relevance)

Under this Directive, all reinsurers must have authorization to engage in reinsurance activities, which is issued by the competent authority in the home member state. For reinsurers to be granted authorization, they must meet certain conditions – they must have a particular legal form, a scheme of operations, they must comply with solvency criteria and they must have a minimum guarantee fund.

On issue of authorization, reinsurers may operate throughout the European Union on the basis of a "single passport". Reinsurers which operated reinsurance activities prior to the adoption of this directive may continue their activities without applying for new authorization. However, the directive still applies to them (Member States may grant them a two-year transitional period).

Member States are required to transpose the provisions of the directive by 10 December 2007.

Directive 2006/43/EC of the European Parliament and of the Council of 17 May 2006 on statutory audits of annual accounts and consolidated accounts, amending Council Directives 78/660/EEC and 83/349/EEC and repealing Council Directive 84/253/EEC The aim of this directive is the significant, if not complete, harmonization of statutory audit requirements. An emphasis is placed on statutory auditors' respect for the highest ethical standards.

A statutory audit requires the relevant knowledge in fields such as company law, tax law and social law. This knowledge should be examined prior to the approval of a statutory auditor from another Member State.

Statutory auditors and auditing companies shall be independent in the performance of statutory audits. They may inform the audited entity of facts discovered during the audit, but they cannot intervene in the internal decision-making processes of this entity.

Statutory auditors and auditing companies must respect the privacy of their clients. Member States are required to transpose the provisions of the directive by 29 June 2008.

Directive 2005/60/EC of the European Parliament and of the Council of 26 October 2005 on prevention of the use of the financial system for the purpose of money laundering and terrorist financing (Text with EEA relevance)

As massive flows of laundered money could impair the stability and reputation of the financial sector and endanger the single market, suspicious transactions should be monitored and notified to financial intelligence units used as national centres for the gathering, analysis and dissemination of notifications on suspicious transactions and other information on potential money-laundering or terrorist financing to the competent authorities.

The directive lays down detailed rules for due diligence of a client, including enhanced due diligence in cases of high-risk clients or business relations, such as suitable processes to determine whether a person is politically exposed and certain other more detailed requirements, e.g. the existence of procedures to inspect the observance of the relevant regulations. All these requirements must be met by all institutions and entities to which the directive applies; it is expected that Member States will amend implementing regulations for these provisions based on the features specific to various provisions and differences in the scope and size of the institutions and entities to which the directive applies. Member States are required to transpose the provisions of the directive by 15 December 2007.

Commission Regulation (EC) No 1864/2005 of 15 November 2005 amending Regulation (EC) No 1725/2003 adopting certain international accounting standards in accordance with Regulation (EC) No 1606/2002 of the European Parliament and of the Council, as regards International Financial Reporting Standard No 1 and International Accounting Standards Nos 32 and 39

This regulation follows up on Commission Regulation (EC) No 2086/2004 of 19 November 2004 amending Regulation (EC) No 1725/2003 on the adoption of certain international accounting standards in accordance with Regulation (EC) No 1606/2002 of the European Parliament and of the Council as regards the insertion of IAS 39 Financial Instruments: Recognition and Measurement.

The published Regulation No 1864/2005 deals with the full opportunity of fair value valuation; it also regulates International Financial Reporting Standard No 1 and International Accounting Standards No 32 Financial Instruments: Disclosure and Presentation.

Commission Regulation (EC) No 1864/2005 entered into force on 18 November 2005 and has been applied since 1 January 2006.

In 2005, the Directives below were also issued; their brief characteristics are provided in the ČAP Annual Report for 2004:

- Directive 2005/29/EC of the European Parliament and of the Council concerning unfair business-to-consumer commercial practices in the internal market,
- Directive 2005/1/EC concerning the establishment of a new organizational structure for financial services committees (the Lamfalussy process),
- Directive 2005/14/EC relating to insurance against civil liability in respect of the use of motor vehicles (the Fifth Motor Insurance Directive).

Information about developments in European insurance industry and the European insurance market can also be found in the Comité Européen des Assurances Annual Report 2005 – 2006 at www.cea.assur.org.

The Insurance Market in 2005

The Czech Insurance Market Overall

Total premiums written in the Czech Republic increased in 2005 by 4.1% compared to 2004 and amounted to CZK 117.2 billion. Premiums written in life assurance rose by 1.7% to CZK 45.0 billion and in non-life insurance by 5.6% to CZK 72.2 billion. The lower dynamism of life assurance growth compared to non-life insurance resulted in a lower share for life assurance in total premiums written. In 2004, the share was 39.2%; in 2005, it was just 38.3%.

Structure of the Czech Insurance Market

	Premiums written	(CZK millions)		Share (%)
Insurance	2004	2005	2004	2005
Total life assurance	44,201	44,954	39,3	38.4
Total non-life insurance	68,374	72,220	60.7	61.6
– accident insurance	1,947	1,959	1.7	1.7
- buildings and structures insurance (individuals)	2,695	2,933	2.4	2.5
- household contents insurance	2,024	2,022	1.8	1.7
- liability insurance of individuals	574	676	0.5	0.6
– medical expenses abroad insurance	1,058	1,148	0.9	1.0
- total insurance for industry and business*	17,680	17,364	15.7	14.8
of which: agricultural insurance	873	945	0.7	0.8
- total motor damage insurance	14,369	15,268	12.8	13.0
- motor third-party liability insurance	21,163	21,737	18.8	18.6
– workmen's compensation insurance	4,551	4,859	4.0	4.1

* not including motor damage insurance

Source: Czech National Bank, ČAP

Comparison of 2004 and 2005:

- the share of non-life insurance in total premiums written went up to the detriment of the share of life assurance,

- the share of industrial and business insurance in total premiums written went down by 0.9%,

- the shares of other monitored insurance rose slightly or stagnated,

- the dynamism of growth recorded by total premiums written was lower than in previous years.

Changes in the shares of individual types of insurance in total premiums written are based on their differing growth dynamism, which is influenced by many factors such as demand, the level of competition, the amount of the premiums and their mutual effect.

Growth Rate in Premiums Written (index - compared to previous year)

Total premiums written	111.9	114.4	112.5	116.5	106.3	104.1
of which:						
- life assurance	114.3	124.2	120.9	120.2	107.5	101.7
– non-life insurance	110.8	109.7	108.0	114.2	105.5	105.6

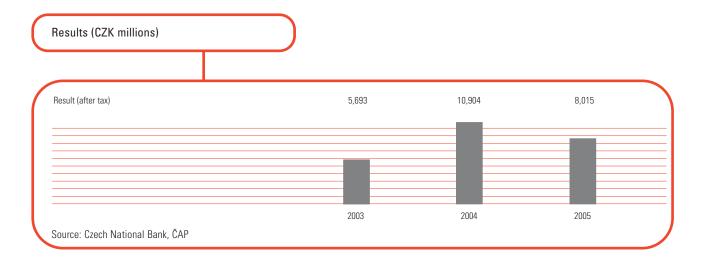

In 2000 – 2003, the rate of growth in total premiums written was higher than 10%, but in 2004 – 2005 was below 10%. This development was evidently caused by a reduction in the dynamism of growth for life assurance. A number of factors came into play here, including: a reduction in the technical interest rate, a reduction in revenues from investments, the keener competition of other financial products and the exhaustion of the growth potential provided by tax incentives. In particular, there was a fall in single premiums; this can be attributed to the high base in 2002 – 2003, which was caused by one-off events such as the transfer of deposits from anonymous passbooks. No decision has been made on pension reform, and therefore the impulse required to trigger the development of life assurance has not materialized.

In non-life insurance, there have been situations specific to each insurance class. For example, the one-off hike in rates after the floods in 2002 was followed by rate stagnation in property insurance in 2004 – 2005 due to the strong competition. This was fuelled also by the fact that, within the EU's single insurance market, insurance companies from other EU Member States operated insurance in the Czech Republic based on the freedom of services provision; this effect was most apparent in the insurance of industrial and business risks.

However, the insurance market's performance cannot be assessed solely based on increases in premiums written. In 2005, the insurance market as a whole increased its financial stability. The aggregate result after taxation was CZK 8 billion. Since 1991, a higher result was recorded solely in 2004 (CZK 11 billion).

	2003	2004	2005
Total revenues	380,163	367,339	259,154
Total expenses	374,470	356,435	251,139
Result (after tax)	5,693	10,904	8,015

Insurance Market According to ČAP Data

The share of ČAP's members in total premiums written in 2005 was 98.8%, i.e. 0.3% less than in 2004.

ČAP gathered more detailed insurance data from its members than that available for the insurance market as a whole. To all intents and purposes, the trends and conclusions of this analysis can be considered to apply to the entire Czech insurance market.

ČAP member revenues in 2005 totalled CZK 257,721 million and total expenses came to CZK 249,540 million. As this would indicate, the overall result after tax stood at CZK 8,181 million.

Total ČAP member premiums written increased by 3.7% in 2005 to CZK 115.7 billion. The growth rate in premiums written was 1.6% for life assurance and 5.1% for non-life insurance.

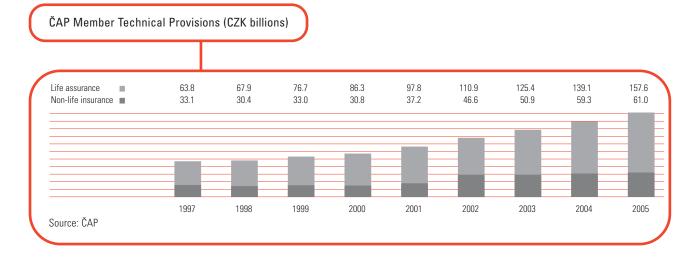

Insurance company registered capital in 2005, at roughly CZK 15.2 billion, was up by 12.6% year on year. Insurance company funds grew by 10.4% to CZK 42.5 billion.

Of technical provisions, those for life assurance increased the most in 2005, rising by 13.3% to CZK 157.6 billion. At the end of 2005, non-life insurance technical provisions totalled approximately CZK 61 billion, a 2.9% rise on 2004. On aggregate, technical provisions were CZK 218.6 billion. The threshold of CZK 100 billion was first reached in 1999. In 2005, the CZK 200 billion threshold was reached for the first time (in 2004 the aggregate technical provisions were CZK 198 billion).

ČAP Member Technical Provisions (CZK billions)

	1997	1998	1999	2000	2001	2002	2003	2004	2005
TOTAL	96.9	98.3	109.7	117.1	135.0	157.5	176.3	198.4	218.6
Life assurance	63.8	67.9	76.7	86.3	97.8	110.9	125.4	139.1	157.6
Non-life insurance	33.1	30.4	33.0	30.8	37.2	46.6	50.9	59.3	61.0

Source: ČAP

In 2005, the overall headcount of ČAP members was 14,120, a drop of 584 employees compared with 2004. However, the number of employees in sales went up by 334. Of this increase, roughly 95% comprised employees responsible for writing insurance.

At the end of 2005, 9,548 exclusive insurance agents and 3,741 tied insurance intermediaries cooperated with ČAP members. Total data on the number of registered insurance intermediaries in the Czech Republic can be found on page 9 of this annual report.

The aggregate balance sheet of ČAP members for 2005 (see Table B in the Statistical Section) indicates that total assets (and thus also liabilities) stood at CZK 316.5 billion and financial placements (investments) at CZK 267.7 billion.

	Value (C	ZK billions)		Share (%)
	2004	2005	2004	2005
TOTAL FINANCIAL PLACEMENTS	249.7	267.7	100.0	100.0
Debt securities	154.9	167.1	62.0	62.4
Deposits with financial institutions	26.9	27.2	10.8	10.2
and and buildings (real estate)	10.4	9.1	4.2	3.4
Participating interests in controlled companies	18.6	22.1	7.4	8.3
Dther	38.9	42.2	15.6	15.7

Comparison of the composition of financial placements in 2004 with 2005:

Structure of Financial Placements (Investments)

- in 2005, compared to the previous year the strongest rise was recorded in "participating interests in controlled companies"; there was also

a rise in the share of "bonds and other fixed-income securities", which are a key investment for insurance companies in the long run, - in 2005, the share of "land and buildings (real estate)" fell the most; the status of other items remained essentially unchanged.

The result of ČAP members' life assurance technical account in 2005 was CZK 4.6 billion; the non-life insurance account stood at CZK 3.6 billion. In 2004, the corresponding figures were CZK 5.6 billion and CZK 2.3 billion respectively. Table C in the Statistical Section of this annual report offers a comparison of the growth dynamism of individual branches and types of insurance. **Premiums written in ČAP members' non-life insurance in 2005 went up by 5.1%**. A high rise was recorded, for example, with the following types of insurance as follows:

- 160.3% for rail damage insurance,
- 28.3% for aircraft hull insurance,
- 19.2% for general business liability insurance,
- 10.2% for sickness insurance (private health insurance).

This selection does not take account of the share of these types of insurance in total premiums written, but monitors trends. For example, premiums written in rail damage insurance were CZK 10.9 million in 2005, but just CZK 4.2 million in 2004.

Non-life insurance as a whole was mainly affected in 2005 by stagnation in the growth of industrial and business property insurance (Table E.14). Premiums written increased by just 2.0% to approximately CZK 12 billion. The situation was brighter for personal property insurance. Premiums written in buildings and structures insurance (individuals) increased by 7.8% compared to 2004 and amounted to almost CZK 3 billion; premiums written in household contents insurance were up by 4.3% to approximately CZK 2 billion. With this latter insurance, there was essentially no change in the number of insurance contracts in the portfolio. In 2004, there were 1,775,000, in the next year 1,782,000. The ratio of the number of valid insurance policies to the total number of households, was approximately 47% in 2005.

Despite the experience, for example, of the disastrous floods in 1997 and 2002, more than half of Czech households still do not have household contents insurance.

The following falls in the growth rate of premiums written were recorded in 2005:

- 22.6% for river/sea hull insurance,
- 3.9% for transport (freight) insurance,
- 3.1% for credit insurance.

Life Assurance in 2005

	Year-on-year change (%) – prer	niums written	Policy portfolio (millions – at 31	December)
	2004	2005	2004	2005
Insurance on survival/death or survival	8.9	-2.7	3.6	3.7
Pension insurance (annuity)	-1.8	-13.7	0.6	0.6
Marriage insurance, birth insurance	-11.6	-0.3	1.0	0.9
Insurance on death	2.8	19.8	1.3	1.5
Insurance linked to investment fund	24.2	24.5	0.5	0.6
Capital operations	-30.4	-13.6	0.3	0.3
Supplementary insurance to life assurance	6.8	7.6	_	-
TOTAL	7.5	1.6	7.3	7.6

In terms of classes of life assurance, the highest pace of growth in 2005 was connected with insurance linked to investment funds, which was at the same level (roughly 24%) as in 2004. This indicates that clients are interested in higher capitalization of their investments. With insurance

on survival/death or survival, in 2005 there was a reduction of almost 3% in premiums written compared to 2004. This can primarily be attributed to the fact that single premiums were approximately CZK 8 billion, 22.1% lower than in 2004. Nevertheless, this insurance, given its 58% share in total life assurance premiums written, continues to be of key significance in life assurance.

The portfolio, i.e. the number of valid insurance contracts as at 31 December, rose by 0.3 million in 2005. An increase in the policy portfolio was recorded for insurance on death, insurance linked to investment funds, and insurance on survival/death or survival.

Private life assurance (insurance on death, insurance on survival/death or survival, pension insurance) has benefited from tax incentives since 2001. In 2005, ČAP members issued 2,731,000 confirmations of private life assurance premiums paid.

Claims Settled

In 2005, 2,295,814 claims were settled, i.e. 6.6% less than in 2004. Result was affected in particular by pension insurance, with consideration for the high base in 2004 and the lower number of claims due to natural hazards. This is because there were no large-scale natural disasters in the Czech Republic in 2005. The number of claims settled rose solely in medical expenses abroad insurance, workmen's compensation insurance, motor damage insurance (other than rolling stock) and general liability insurance.

Structure of Claims Settled in 2004 and 2005 (%)

	2004	2005
Life and pension	49.5	43.5
Theft	2.0	1.8
Accident	4.1	4.2
Crops and livestock	0.3	0.2
Motor damage	10.8	11.7
Natural hazards	4.6	3.4
MTPL	14.4	15.3
Other	14.3	19.9

2005 Statistics

Detailed statistics on developments in the Czech insurance market and on the cumulated results of ČAP members can be found in the Statistical Section of this Annual Report. The figures for 2004 are definitive, while the figures for 2005 are as at 31 May 2006.

Summary

On the whole, the results posted by insurance companies in 2005 are satisfactory. Although there was a dip in the growth rate of premiums written, there was also a relatively high result after taxation. Competition increased, in part in connection with the Czech Republic's EU membership. In 2005, the Czech Republic was not hit by any large-scale natural disasters or mass claims.

ČAP Operations in 2005

The General Assembly held on 23 March 2005 approved a plan setting out priority goals and approving the plan of main tasks for the secretariat, sections, and stand-alone work groups.

The Association respected these requirements in its work and also paid greater attention to legislation. On 1 January 2005, Act No 37/2004 on Insurance Contract and Act No 38/2004 on Insurance Intermediaries and Independent Loss Adjusters entered into effect. The Association contributed to the practical application of provisions of these laws. It also promoted amendments to the insurance laws adopted in 2004, especially during debates on the Financial Conglomerates Bill. The Association started concentrating more on analyses of developments in the Czech insurance market as part of the single insurance market of Member States of the European Union.

Priority Goals

Pension reform and taxation of supplementary systems

One of ČAP's fundamental goals was to promote more space for insurance companies and for private life assurance within pension reform. In this respect, the Association monitored and assessed the work of so called the Bezděk Commission and the negotiations of political parties regarding agreements in this field. While it backed an increase in limits for the deduction of premiums paid from the tax base within the scope of the draft agreement, it did not agree with a common limit for private life assurance and state-subsidized supplementary pension schemes. In the end, the political parties were unable to concur on the draft agreement. Despite the Association's efforts, it failed to get support for the creation of a second mandatory pillar involving existing operators, i.e. life assures and pension funds.

The Association submitted comments on the draft amendment to the Income Tax Act, which essentially contained the same principle of tax regulation as was mentioned above in the context of the draft agreement of the political parties. However, it rejected the proposals to amend the Act on Insurance Contract and Act on Insurance which were aimed at expanding the insurers' obligation to disclose information beyond the scope required under European directives.

Solvency II

The task was to develop work within the Association on the Solvency II project. Therefore, at the beginning of the year a work group was set up whose members also included selected external experts. Its activities resulted in a document analysing the difference approaches to solvency, classifying the risks encountered by insurance companies, and offering instructions on how to process this issue at insurance companies. After a discussion by the presidium, the document was published and can be found at www.cap.cz.

Private Health Insurance

ČAP drew up an analysis of the financing of health care in the Czech Republic and proposed a concept for the development of private health insurance. In November 2005, a decision was made that proposed variants of the solution in the development of private health insurance needed to be elaborated, with a particular stress on removing certain types of health care from public health insurance that could be covered by private insurance. The relevant studies will be completed in 2006.

Motor Third-Party Liability Insurance

In the legislative process, ČAP promoted amendment proposals concerning problems in the field of operating this type of insurance.

Insurance Fund

The aim was to examine the possibilities of creating a system for the insurance of natural hazards in the Czech Republic and to discuss them with the government.

During 2005, ČAP's conceptual approaches were refined. Talks with the Ministry of Finance opened up many new issues. It became clear that it would be advisable to re-assess the variant of a pool solution and focus on economic calculations and the incorporation of certain new risks into the system. Work in the field will continue in 2006.

Insurance Fraud

ČAP's aim was to ensure that insurance fraud legislation, in connection with discussions on the draft of the new Criminal Code, did not become worse than the present situation. The Association failed in its attempts to promote more precise amendment proposals, but the draft Criminal Code as a whole was not passed any way.

Czech Insurance Association

Application of the Act on Insurance Intermediaries and Independent Loss Adjusters

The Association's task was to contribute to the application of the above-mentioned law in practice.

One of the key issues was to secure material for the preparation of insurance intermediaries in readiness to take professional examinations. This resulted in the production of the study aid ČAP – "Study Texts", which were acquired by some ČAP partners at the beginning of 2005 under licensing agreements. In January 2005, the ČAP Presidium approved the "ČAP Examination Rules for Professional Examinations in the Basic Level of Professional Competence for Insurance Intermediaries and Independent Loss Adjusters", together with a list of the chairs and members of examining boards for professional examinations at ČAP. The Association also recommended selected members of ČAP bodies to the examining boards of the Ministry of Finance.

Professional examinations were held not only in insurance companies and other approved institutions, but also at the ČAP Secretariat.

In the practical application of the law, it became apparent that the Association must pay attention, in cooperation with the Ministry of Finance, to the interpretation of selected provisions of the law. In certain cases, agreement was reached on the interpretation or on the need to amend the law. ČAP's amendment proposals were finalized in September 2005. Within the scope of debates on the bill to amend the law in connection with the unification of financial market supervision, including an amendment to Act No 38/2004, the Association succeeded only in asserting the separate regulation of the status of exclusive insurance agents, ensuring that this intermediary may have subordinate insurance intermediaries, and unifying the claims limit for professional liability insurance in cases where an entity is registered as both an insurance agent and an insurance broker.

Further amendments to Act No 38/2004 are envisaged in 2006.

Selected ČAP Results

In 2005, ČAP's bodies carried out not only priority tasks, but also dozens of "main tasks". Specific fruits of their efforts include: the launch of the ČAP Extranet, the purchase of stocks of books from Česká pojišťovna a.s. and their relocation to ČAP, the conclusion of a new cooperation agreement between the Police Presidium of the Police of the Czech Republic and ČAP, the launch of the Property Protection Council, the implementation of a PR campaign to promote sales of life assurance, the preparation of opinions and documentation on the draft report of the World Bank on its evaluation of Corporate Governance in Czech insurance industry.

ČAP Bodies and Membership Base

The ČAP Presidium paid special attention to the procedure applied in the fulfilment of priority goals. In 2005, it met six times.

Sections and work groups, besides working on their own main tasks, also contributed to the fulfilment of the Association's goals. In 2005, ČAP had 9 sections, a Bureau for the Prevention of Insurance Fraud, 17 standing work groups, 19 temporary work groups and other bodies, and two editorial boards for ČAP periodicals (Pojistný obzor, Pojistné rozpravy), i.e. in total 48 bodies.

The ČAP Secretariat contributed to the fulfilment of the priority tasks and main tasks of sections and stand-alone work groups. It was responsible for the coordination and operation of the Association, including its financing. Some tasks were almost fully in its competence, such as the building of the Extranet or an expansion in the Association's book collection by purchase from Česká pojišťovna a.s.

At 31 December 2004 the Association had 26 members and three associate members. On 4 January 2005, Atradius Credit Insurance N.V. (associate member) left ČAP, followed on 31 December 2005 by Gothaer Allgemeine Versicherung AG, organizational unit for the Czech Republic (full member).

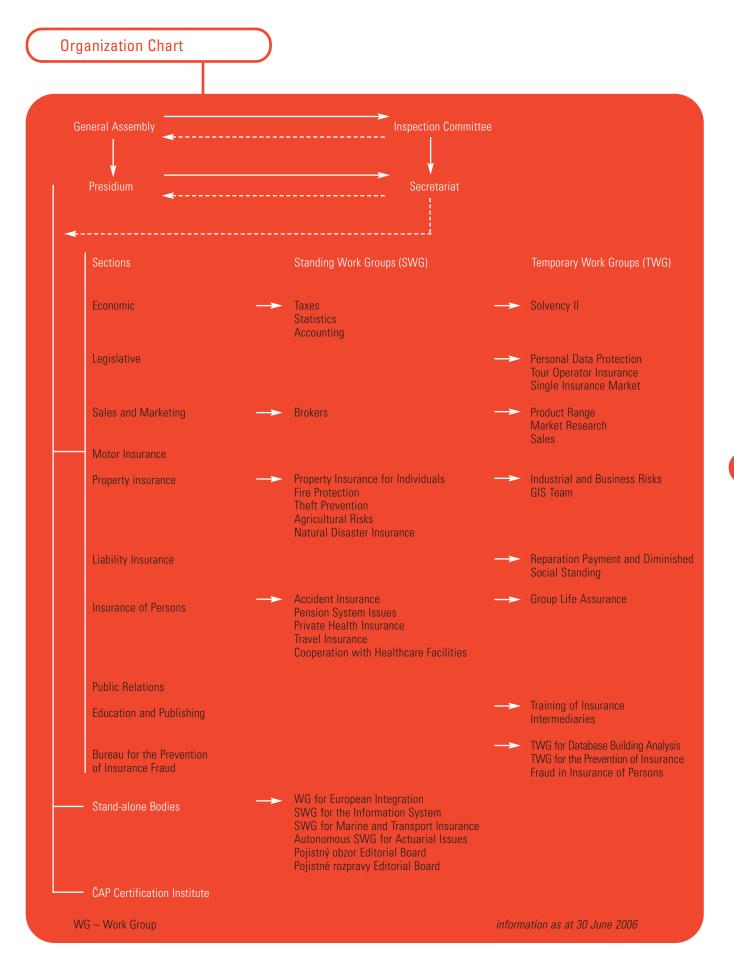

As at 1 January 2006, the Association therefore had 25 members and two associate members.

ČAP Priority Goals in 2006

The General Assembly held on 29 March 2006 approved a plan setting out the main tasks of the sections, stand-alone work groups, and the Secretariat for 2006.

It also defined the priority goals:

- within the scope of pension reform, to promote a solution to the second pillar of the pension system that will enable insurance companies to participate actively, or to promote at least an improvement in the tax legislation for private life assurance,
- to continue actively opposing the Act on Accident Insurance of Employees,
- to prepare and implement a project of private health insurance with the aim of enabling commercial supplementary insurance to cover a certain range of care removed from public health insurance or persons removed from the public system,
- to draw up an insurance model for natural disaster claims and promote it, including the related legislation,
- to develop effective cooperation with the regulator and the supervisory body in relation to the adoption of Act No 57/2006 amending laws in connection with the unification of financial market supervision.

Notes:

- Allianz pojišťovna offers pleasure craft insurance only.

 – Allianz pojišťovna, Česká pojišťovna, and Generali Pojišťovna offer special types of suretyship insurance.

- The Czech Insurers' Bureau (ČKP) offers frontier insurance.

 Česká pojišťovna, ČPP, Generali Pojišťovna, Kooperativa, and UNIQA offer suretyship insurance in the event of tour operator bankruptcy.

- Euler Hermes Čescob began offering suretyship (direct) insurance as of January 2004.

 – Generali Pojišťovna offers legal expenses insurance supplementary to motor insurance and tour operator insolvency insurance.

Hasičská vzájemná pojišťovna also insures liability of the statutory bodies of housing cooperatives.
ING Nationale-Nederlanden offers accident insurance and dread disease insurance as supplementary

insurance only.

Komerční pojišťovna offers sickness insurance only as part of KB consumer credit insurance.
Slavia also offers insurance of the financial ability of carriers.

Source: ČAP (based on aggregate data supplied by the CNB)

Notes:

- 1. ČAP also thanks all non-member insurance companies for supplying data and information. A complete list of all insurance companies (ČAP members and non-members) licensed to carry on insurance activities in the Czech Republic is available at www.cnb.cz.
- 2. The figures for 2004 are definitive; the figures for 2005 are provisional based on the situation at 31 May 2006 and draw on information supplied by insurance companies (applicable to the Czech market as a whole and ČAP Tables A H).

36

^{*} primarily includes property insurance, general liability insurance, credit insurance, besides motor damage insurance, motor third-party liability insurance, and workmen's compensation insurance

E. Summary Tables for Selected Insurance Types

E.1 Insurance on Survival/Death or Survival

	Indicator	Unit	2003	2004	2005	2004/2003	2005/2004
1	Premiums written, of which:	TCZK	24,422,779	26,594,123	25,879,297	108.89	97.31
2	single premiums	TCZK	9,057,366	10,208,277	7,953,778	112.71	77.91
3	Claims paid	TCZK	7,739,142	12,168,010	10,252,599	157.23	84.26
4	Portfolio premiums under policies valid as at 31 December	TCZK	19,653,687	22,294,607	26,870,751	113.44	120.53
5	Portfolio – number of policies as at 31 December, of which:	number	3,234,232	3,583,926	3,681,861	110.81	102.73
6	current premiums	number	2,945,702	3,106,473	3,316,979	105.46	106.78
7	Number of claims settled	number	284,195	515,112	399,529	181.25	77.56
8	Number of claims outstanding	number	14,270	11,173	7,393	78.30	66.17

E.2 Insurance on Death

	Indicator	Unit	2003	2004	2005	2004/2003	2005/2004
1	Premiums written, of which:	TCZK	597,225	613,766	735,248	102.77	119.79
2	single premiums	TCZK	128,942	22,880	40,850	17.74	178.54
3	Claims paid	TCZK	111,287	129,201	306,906	116.10	237.54
4	Portfolio premiums under policies valid as at 31 December	TCZK	422,355	515,628	598,881	122.08	116.15
5	Portfolio – number of policies as at 31 December, of which:	number	926,231	1,333,061	1,492,242	143.92	111.94
6	current premiums	number	887,950	1,182,320	1,433,936	133.15	121.28
7	Number of claims settled	number	7,461	8,557	7,821	114.69	91.40
8	Number of claims outstanding	number	495	651	727	131.52	111.67

E.3 Marriage Insurance and Birth Insurance

	Indicator	Unit	2003	2004	2005	2004/2003	2005/2004
1	Premiums written, of which:	TCZK	2,792,668	2,467,473	2,460,641	88.36	99.72
2	single premiums	TCZK	41,403	37,659	38,870	90.96	103.22
3	Claims paid	TCZK	2,104,015	2,339,165	3,283,111	111.18	140.35
4	Portfolio premiums under policies valid as at 31 December	TCZK	2,628,968	2,493,417	2,405,999	94.84	96.49
5	Portfolio – number of policies as at 31 December, of which:	number	1,125,654	982,280	852,062	87.26	86.74
6	current premiums	number	1,010,658	918,577	806,808	90.89	87.83
7	Number of claims settled	number	100,332	107,222	150,671	106.87	140.52
8	Number of claims outstanding	number	5,366	3,805	2,315	70.91	60.84

E.4 Pension Insurance (Annuity)

	Indicator	Unit	2003	2004	2005	2004/2003	2005/2004
1	Premiums written, of which:	TCZK	3,306,676	3,246,627	2,801,115	98.18	86.28
2	single premiums	TCZK	518,140	543,456	149,552	104.89	27.52
3	Claims paid	TCZK	2,638,005	5,660,915	2,234,706	214.59	39.48
4	Portfolio premiums under policies valid as at 31 December	TCZK	2,850,182	2,863,408	3,730,076	100.46	130.27
5	Portfolio – number of policies as at 31 December, of which:	number	809,218	643,688	643,568	79.54	99.98
6	current premiums	number	775,410	608,314	611,008	78.45	100.44
7	Number of claims settled	number	94,486	234,769	56,351	248.47	24.00
8	Number of claims outstanding	number	5,746	2,141	1,234	37.26	57.64

E.5 Insurance Linked to Investment Fund

	Indicator	Unit	2003	2004	2005	2004/2003	2005/2004
1	Premiums written, of which:	TCZK	4,877,722	6,051,612	7,515,060	124.07	124.18
2	single premiums	TCZK	2,314,664	2,837,014	3,089,714	122.57	108.91
3	Claims paid	TCZK	725,756	1,029,217	1,368,887	141.81	133.00
4	Portfolio premiums under policies valid as at 31 December	TCZK	3,153,499	4,445,416	6,827,175	140.97	153.58
5	Portfolio – number of policies as at 31 December, of which:	number	367,793	495,404	589,469	134.70	118.99
6	current premiums	number	359,991	482,727	569,509	134.09	117.98
7	Number of claims settled	number	5,894	16,079	20,584	272.80	128.02
8	Number of claims outstanding	number	59	117	130	198.31	111.11

E.6 Capital Operations

	Indicator	Unit	2003	2004	2005	2004/2003	2005/2004
1	Premiums written, of which:	TCZK	663,269	461,313	398,380	69.55	86.36
2	single premiums	TCZK	570,592	325,947	281,932	57.12	86.50
3	Claims paid	TCZK	270,557	324,959	638,049	120.11	196.35
4	Portfolio premiums under policies valid as at 31 December	TCZK	4,457,159	5,071,508	4,704,307	113.78	92.76
5	Portfolio – number of policies as at 31 December, of which:	number	326,474	335,319	291,517	102.71	86.94
6	current premiums	number	4,687	21,492	3,661	458.54	17.03
7	Number of claims settled	number	14,974	15,674	36,828	104.67	234.96
